MONDAY

TUESDAY

WEDNESDAY

THURSDAY

FRIDAY

Snowflakes actually start as tiny ice crystals that form from water vapor that freezes in the atmosphere.

The size of a snowflake depends on how many ice crystals connect together.

Each snowflake is made up of about 200 ice crystals.

There is no scientific proof that no two snowflakes aren't exactly alike.

On average snowflakes fall from the sky at 3-4 miles per hour.

**Merry Christmas and Happy New Year!
